

Rik Duel's ship "Moonshadow" doesn't feature too prominently in the comics, in fact it's only seen from the aft in it's first appearance in issue 70! It does show up in greater detail in issues 82 and 87. In issue 90, however, it looks very different, but I've attempted to account for that in the capsule below. A special tip o' the hat to Halagad for suggesting the fix.

#### The Moonshadow

**Craft:** Modified Corellian Engineer Corporation SE-1001 Courier

**Type:** Modified Light Freighter

**Scale:** Starfighter

**Length:** 40 Meters

**Skill:** Space Transports: SE-1001

**Crew:** 2

**Passengers:** 8

**Cargo:** 75 metric tons

**Consumables:** 2 months

**Hyperdrive Multiplier:** x2

**Hyperdrive Backup:** x13

**Nav Computer:** But of course!

**Maneuverability:** 1D+2

**Space:** 5 / **Speed:** 2D+2

**Atmosphere:** 295; 850 kph

**Hull:** 3D+1

**Shields:** 2D

**Sensors:**

*Passive:* 15/1D

*Scan:* 30/2D

*Search:* 50/3D

*Focus:* 3/4D

**Weapons:**

**Dual Laser Cannon**

Fire Arc: Turret

Crew: 1

Skill: Starship Gunnery

Fire Control: 2D

Space Range: 1-3/12/25

Damage: 4D

**Capsule:** Wishing to capitalize on the success of it's durable YT transport series, the Corellian Engineering

Corporation designed the SE series to be a versatile companion and cheaper alternative to CEC's standard stock light freighter line. The SE-1001's basic design intentionally evokes the classic hammerhead look of the ubiquitous Corellian Corvette and share's many of its larger cousin's multi-purpose innovations. While the SE courier lacks the sheer toughness and cargo capacity of the YT, its large drive section and dual maneuvering thrusters give it enough power to outfly most other starships in its class. Much like the salon pod of the famed Republic Cruiser, the SE's bridge is a removeable module and may be detached for upgrade or replacement. Although this configuration is not recommended for standard use, the SE may be flown from engineering in the event the bridge module has been removed. Consider Maneuverabilty to be 0D in such cases.

The SE courier never approached the popularity of the YT, and Corellian Engineering discontinued the line after only a few decades of production. Never a company to waste a functional idea, CEC eventually adapted some of the SE's design into it's GS class courier which drew its inspiration from CEC's Republic Cruiser and gunboat class vessels.

Rik Duel's ship, "Moonshadow" began life as the "Splendid IX," and according to Imperial records served in the diplomatic corps of Lord Tion of Ralltiir. Although Duel claims that the "Splendid IX" was awarded to him in exchange for some duty performed for Lord Tion prior to his death, official records list the starship as stolen and note a 7500 credit bounty on Duel's head. Duel is a fair pilot at best, and he leaves care of the ship to his friend Chihdo. Although "The Moonshadow" remains close it's stock configuration, Chihdo has upgraded the shield generators and keeps the engines humming and clean.

The Moonshadow was created by Jo Duffy, Kerry Gammill, Ron Frenz and Tom Palmer.
